Deepwater

Technical Symposium

Geoscience Opening Seminar
Monday August 27, 2018

Schlumberger

DEEP WATER EXPLORATION IN A DIGITIZED WORLD

John Dribus

Ravi Chhibber

John Dribus and Ravi Chhibber of Schlumberger will lead a guided tour through the future of exploration in a “digitized world”, covering a wide range of topics including:

- Data Analytics
- Seismic Data Management
- High Performance Computing
- Seismic Machine Learning (AI Interpretation)
- Drilling Automation
- Digital Communication and Control

The journey into the digital future will look at how the nature of exploration will change and how people, processes and technology will transform into a new way of working.
